

Improved award-winning product design raises the industry standard

LED display lighting specialists MegaLED Ltd, is raising the industry edge-lighting standard with their new and improved edge-lit sign product 'A-Blade'. At just 12mm thick, the award winning A-Blade design offers the perfect combination of striking industrial design, low running costs and flexibility. In development since 2003, the product's innovative design affords literally endless design configurations and represents the culmination of over 10 years' experience in sign-lighting design and innovation.

Steve Kane, A-Blade product manager says: "We're proud of our design and 100% reliability track record. A-Blade represents the perfect balance of innovation coupled with economy and reliability. We offer sign makers a premium, affordable service to purchase one-off custom illuminated signs, delivered ready to install within 2-3 weeks. Through our own state of the art manufacturing facility we can also cater to large volume orders."

Each sign is sold ready to install, using the latest CNC 3D carving and creative masking techniques. MegaLED also offer a full lighting design consultancy service where required, providing both businesses and sign manufacturers with an unparalleled service, from concept design right through to manufacture and delivery.

To find out how A-Blade signs can raise the profile of your business, please contact Steve Kane on +44(0)207 617731 or email info@megaled.co.uk.

Durable Signs add to its vandal resistant sign and display product range

Durable Signs of Bridlington, East Yorkshire, recognised as providing sign companies with a comprehensive solution to vandal attack, weathering and UV fade of colours to signs with its own unique and proven DurableOne system, is delighted to announce the launch of a range of pre packed cleaning and restoration materials to enhance its already impressive signs.

Now available, these can be purchased either separately or in mixed packs that include a scourer and microfiber cloth for extra value. Materials are biodegradable, low odour, quick, easy and safe to use making them ideal for sign companies to use themselves or sell on to their customers. The four products are Dura Repair – scratch remover and repair, Dura Clean - graffiti remover for paint, marker pen, oil, grease, poster glue, crayon and bubble gum, burn marks, Dura Clear - dirt removal & surface revival removes mold, moss, traffic grime and returns weather affected signs to original condition and Dura Shine – express wet wax polish and protection is

compatible with the DurableOne coating that gives signs extra protection, improves appearance and repels dirt and grime

Andrew Frost, Managing Director for Durable Signs states: "DurableOne is the most comprehensive protection for signs against vandal attack, weathering and UV fade in the UK today and this development confirms our on-going commitment to keep investing in practical and relevant products to the benefit of our customers. It is common sense to use the correct protection, restoration and repair materials for the most cost effective and time saving solution. Sign companies can continue to promote DurableOne finished signs to their customers with absolute confidence that they are offering the best proven and value solution in the market, backed by a 10 year Warranty and now with cleaning strategies and equipment that are easy to use, non toxic and environmentally friendly."
